

# August 2025

In the summer avoid putting curbside waste out the night before as it can attract animals and insects, making collection difficult.

- Compact fluorescent bulbs and fluorescent tubes contain a small amount of mercury and must be taken to a Household Hazardous Waste Depot.
- All other types of light bulbs (incandescent, halogen and LED) are also accepted at the Household Hazardous Waste Depot for recycling. If broken please wrap to avoid injury to your garbage collector.

For any blue box related questions or concerns, please contact Emterra Environmental at 1-888-597-1541.
